

Lychee Learning

Learning hub brochure

For families at learning hubs around the world

A learning path that *travels* with your child.

Personalized academic learning for families at learning hubs around the world.

Community at the hub.

Continuity wherever you go next.

LEARNING WITHOUT STARTING OVER

**Every new place adds something
to your child's education.**

**New friendships. New cultures. New experiences.
New ways of seeing the world.**

That is what makes worldschooling so valuable.

But when families move between countries and learning hubs, academic learning can begin to feel disconnected. Each place may follow a different program, teach topics in a different order, or begin from a different starting point.

Your child should not have to start again every time the location changes.

Lychee Learning creates one personalized academic path that continues with your child, from one hub to the next and during the time in between.

**The world around them can keep changing.
Their learning remains connected.**

ONE EXPERIENCE, TWO KINDS OF SUPPORT

The best of the learning hub, supported by a clear academic path.

AT A LEARNING HUB, YOUR CHILD
FINDS

The place to belong

- Friends and community
- Local experiences
- Creative activities
- Daily support
- A place to explore and belong

THROUGH LYCHEE LEARNING, YOUR
CHILD RECEIVES

The path to grow

- A personalized academic plan
- Individual progress tracking
- Weekly learning materials
- Clear explanations and supporting videos
- Two one-on-one teacher sessions each week
- A real-world project every six weeks

Together, the hub and Lychee support both sides of your child's education.
The hub creates the environment where children connect, explore, and grow.
Lychee makes sure their core academic learning continues with purpose and direction.

BUILT AROUND YOUR CHILD

We begin with what your child understands, not simply their age or grade.

Every child starts from a different place. That is why Lychee Learning does not place every student into the same standard program.

800+

individual math skills

750+

individual literacy skills

Before your child begins something new, we look at the earlier skills that support it. When a foundation is strong, they move forward. When a skill needs more attention, we strengthen it first.

This means your child is not pushed through work they are not ready for or held back by lessons they already understand. **They follow a path designed around what they need next.**

LEARNING THAT FEELS PERSONAL

We also connect lessons to the things your child already cares about.

A child who loves **soccer** might practice math through jersey orders, player statistics, or ticket sales.

A child who loves **animals** might develop reading, writing, and budgeting skills while planning an animal rescue center.

The academic goal stays clear. The experience feels personal.

STRONG SKILLS WITH A REAL PURPOSE

Children need practice. They also need to understand why learning matters.

Lychee Learning combines focused academic work with **projects** inspired by your child's interests.

Guided academic practice

Your child receives personalized worksheets, clear explanations, and supporting videos. These activities help them practice new skills, build confidence, and become more independent. The level, examples, pace, and support are adapted to the individual child.

Real-world projects

Every six weeks, your child develops a project based on an idea they care about. They might:

Create a restaurant · **Build a sticker company** · **Design a clothing brand**
Plan an animal rescue center · **Develop a product** · **Explore an idea of their own**

We then connect their current academic skills to the project. **Math** becomes part of setting prices, measuring, planning, and budgeting. **Literacy** becomes part of researching, writing, advertising, and presenting.

**Children do not only learn a skill on paper.
They discover what they can do with it.**

SUPPORT THAT CONTINUES

A teacher who already knows your child.

Your child meets online with their Lychee Learning teacher twice each week. These are personal sessions, not large online classes. The teacher reviews recent work, explains difficult ideas, celebrates progress, and decides what the child is ready to learn next.

Over time, the teacher learns:

- What motivates your child
- Which skills feel easy or difficult
- How they respond to frustration
- Which explanations help them understand
- What they are proud of
- Where they need more confidence

Even when your family moves, your child continues with someone who already knows their learning.

You do not have to manage everything alone.

Lychee takes care of the academic planning, skill tracking, and next steps. Parents receive practical guidance to help with motivation, independence, new concepts, and difficult learning moments. You remain part of your child's education without having to design and manage the entire program yourself.

DESIGNED AROUND HUB LIFE

Learning that fits naturally into your family's week.

The program is designed to work alongside the focused learning time at The learning hub. Your child can complete much of their academic learning at the hub, with an educator nearby to support the learning environment and answer questions. When additional time is needed, learning can continue independently at home.

The program can also adjust around:

- Travel days
- Changing time zones
- Busy activity weeks
- Family plans
- Time between learning hubs

**Your child does not lose their place when life changes.
We simply continue from where they are.**

EXCLUSIVE OFFER FOR [HUB NAME] FAMILIES

Give your child freedom
with a clear path underneath it.

YOUR PARTNER RATE

EXCLUSIVE FOR LEARNING HUB FAMILIES

Learning Hub Package

\$180 / month
